CORE CAPABILITIES

- Enterprise ServiceNow architecture, administration, and ITSM program ownership. Certified Systems Administrator. Collaborative and consultative approach to Service and Work Process Design and Platform and Program Adoption.
- Service and capability maturation — turning friction and institutional noise into measurable procedures, rubrics, and roadmaps, whether delivered internally or consultatively.
- Leadership through operational debt — the small process mis-alignments that threaten large-scale digital transformations, inside enterprises and across consulting engagements alike.
- Applied AI / GenAI enablement — coaching teams on practical LLM use for document work, analysis, and workflow, and distinguishing real productivity from its synthesized cousin.
- Quantitative and spatial analysis — GIS service ecosystem mapping, and data visualization and modeling analysis.

PROFESSIONAL EXPERIENCE

Independent Consultant — Process and Capability Maturation | Data Literacy and Analysis | AI Capability Coaching

Feb 2025 – Present

- Coached professional-services teams on applied GenAI tool use, small-dataset analysis, and graphics generation — distinguishing the time these tools save from the time they invent.
- Performed data analysis on small, high-stakes datasets (vulnerability assessments, benefit analyses) to inform negotiation posture. Conducted on-site operational assessment of workflow and customer-behavior patterns; delivered short- and medium-term service-maturation recommendations written for immediate action.
- Built nonprofit capacity planning analyses: a GIS project mapping the institutional ecosystem (peer centers, waste and recycling facilities, universities, art partners) paired with queuing and tasking models in Mathematica profiling capacity and demand under varied load.
- Designed security prevention and response plans for device loss, capture, or data breach for attorneys. Crafted fortification plans for IT asset management, communication protocols, and contingency planning for rapid unforeseen need for response.

Enterprise Systems Architect & ITSM Strategy Program Manager — H&R Block

Mar 2016 – Jan 2025

Platform Architecture | System Administration | Implementation & Integration | IT Program Management

- Held strategic ownership of the enterprise ServiceNow instance — architect, administrator, and developer — for a 16,000-user organization. Directed platform migrations and multi-system integrations; implemented Case Management, GRC/IRM, HR Services, Vendor Risk, IT Asset Management (SAM/HAM), and Vulnerability Management modules.
- Designed and deployed a global Service Catalog, reducing manual hand-offs by 40% and shifting delivery timelines from days to hours. Integrated CI/CD pipelines with change management; automated Standard Change processing to remove standing manual overhead.
- Built a comprehensive CMDB with service mapping and automated discovery, enabling proactive problem management and high-fidelity change impact analysis.
- Designed and conducted organizational change management and training for ServiceNow interfaces, applications, modules, and processes. Created knowledge management and training artifacts, guided tours, and group and individual training for operational, technical, leadership, and business stakeholders.

ITSM Systems and Process Manager, QA Manager — UMB Bank

Sep 2006 – Oct 2015

Platform Management | Service Desk | Quality Assurance

- Led enterprise platform operations and ITIL Service Desk teams for a 500+ employee organization, managing incident, change, problem/RCA, and knowledge management functions.
- Chaired the Change Advisory Board (CAB) and led Major Incident Reviews and Root Cause Analysis sessions.
- Established a Software Quality Assurance practice spanning the full product life-cycle — requirements validation, performance and load testing, database and API testing — informed by production telemetry.
- Transformed the Service Desk into a professional development hub; the mentorship culture improved retention and service quality more than any tooling change did.

TECHNICAL PROFICIENCIES & EDUCATION

- **Enterprise Platforms:** ServiceNow (Architecture, SysAdmin, Integration, Development) and ServiceNow Certified Systems Administrator, BMC Remedy, Datadog, PagerDuty, Rapid7, Qualys, Workato, Workday HCM.
- **Modules & Frameworks:** ITIL, Agile, DevOps, CMDB, Discovery, Service Mapping, GRC/IRM, ITAM (SAM/HAM), Case Management, Field Services/Facilities Management, HR Services, Vulnerability Management.
- **Toolkit:** Mathematica, SQL, KQL, Power BI, Tableau, Excel, Grafana; GenAI/LLM tooling (Claude, Gemini, ChatGPT, etc.) ML, graph analysis; GIS for spatial and demographic pattern analysis; Microsoft Azure, CI/CD integration, JavaScript, JIRA, Confluence, API testing; requirements elicitation and performance analysis.
- **Education :** MA, Geography — University of Missouri, Columbia. BA, Spanish — Washington University in St. Louis. — Pontífica Universidade Católica do Rio de Janeiro, RJ, Brasil, Modern Language Center, Amman, Jordan.
- **Languages:** Fluent Portuguese and Spanish; Intermediate Levantine Arabic.
